

## **Natural Resources**

Air: Adopted 1972, Review 1990.

The League supports policies and actions that establish the strictest air-quality standards to protect air resources, and that develop efficient enforcement and implementation procedures to attain and maintain high quality standards, not to preclude participation in regional planning.

Water: Adopted 1969, Update 1975, Review 1981, 1986, Update 1996.

The League supports policies and actions that provide for protection and efficient management of water resources, with emphasis on conservation and high standards of environmental quality in all areas. League supports consideration of a variety of water supply sources, including reclamation.
